Regarding patent application Serial number 10812380
Khan Hybrid Arteriovenous Shunt
Examiner : Leslie Deak

Ms Deak you have sent the communication for this patent to the wrong address again. This is the 2nd time you have sent this sensitive legal document intended only for our review to the wrong person. They at Harness, Dickey and Pierce received it via email. Can you send it to the address that is on the communications we have sent you and on the address I had to fill out and fax 3 times to you and the patent office regarding the revocation of attorney and address change. The new date should reflect the date you are sending the new communication to us. Our former attorney has even called many times and spoken to you about the change of address as have I. I will call you again and leave a message if you are not there regarding the address again.

Thank you,

Dr I Khan and Dr. N Khan
